AQdex Srl is the exclusive distributor of AQ Davinci water dispensers for Italy. The company was founded by a team of entrepreneurs sensitive to the themes of innovation and sustainability, aiming to improve the distribution of quality water dispensing products in Italy with the lowest environmental impact. AQ Davinci dispensers are elegantly designed, safe, and reliable over time.

AQdex is a commercial partnership with the Californian company DRINKSTATION.

Additional features

- Hot water for drinking with a double safety button to prevent accidental dispensing.
- Switch to inhibit hot water dispensing, setting the device to "child-proof" mode (red light to indicate status).
- Switch for hot water production to set the device to "energy-saving" mode.
- Anti-flood device.
- Automatic safety control against overheating of hot water.
- Life-saving protections on electrical circuits.
- High-efficiency instant cooling system (cools 75 liters of water per hour for the production of natural and sparkling cold water).
- Prepared for connection with large external CO2 cylinders (professional use).

Appreciated by our users worldwide.

- Real stainless steel, Italian design.
- Hands-free automatic filling.
- Environmentally friendly.
- Completely patented and certified (UL, NSF, CE).
- Purified with micro-filtration system and UV light.
- Drinking water as you prefer, using your home's potable water.
- Mineralized alkaline water (optional under-sink module).

Ideal for Restaurants, Offices, and Home.

The patented and recyclable Actifilter™ multi-stage filtration system and UV LED light allow for the removal of all harmful chemical compounds, bacteria, and microorganisms – a flashing green light indicates when it's time to replace the filter. The sparkling water dispensing is customized to your taste – using the "bubble level" knobs, you can decide how sparkling your water will be.

The Davinci includes a SodaStream™ CO2 food-grade cylinder and an installation kit that allows you to connect it directly to your home's water supply. The Alkaline module (installable under the sink) is available upon request. Davinci is patented in the US and made using high-quality stainless steel. It is designed with the environment in mind, minimizing the carbon footprint.

**Simple maintenance,
with SodaStream CO2
cylinders and an
extremely easy-to-
change filter, usually
once a year.**
